Dear All,

As a demonstration of Data Solutions compassion, and Inline with our ongoing commitment to uphold the privacy of data, we have decided that it would be in the public's best interest to remove all known geographies associated with the Victorian Fires.

As such, all data from DSA, supplied after 16th February 2009 will no longer include data from the associated geographies affected by the Victorian Fires, until further notice.

We hope that this goes some way, to allowing the Victorian Fire Victims, the time, space and compassion they need to rebuild and move on.

To all persons being affected by this tragedy, our hearts, thoughts and prayers are with you all.

Sincerely,

David Webb

Director Data Solutions Australia.

bringing the right customers to you
